Active Infective Endocarditis

New insights for effective treatment

Tuesday, 12 September 2006
The Stockholm International Fairs Building
Room K21 (Level 1)
07:00 - 08:30 hours

A Call for New Criteria for Surgical Treatment of Active Infective Endocarditis

Prof. Henryk Siniawski, MD, PhD
Deutsches Herzzentrum Berlin, Germany

Early and Mid-term Results of the Shelhigh Stentless Bioprosthesis in Patients with Active Infective Endocarditis: The Impact of timing on outcomes: When should patients be sent for surgery?

Michele Musci, MD
Deutsches Herzzentrum Berlin, Germany

Pathophysiology of No-React® Treated Tissue and Resistance to Infection

Shlomo Gabbay, MD
Shelhigh Research Institute, New Jersey, USA

Experience with over 300 Consecutive Patients using a Shelhigh No-React® Treated Aortic Bioprosthesis: Is endothelialization responsible for resistance to infection and degeneration?

Pascal Dohmen, MD, PhD
Charité, Humboldt University, Berlin, Germany

LIGHT BREAKFAST WILL BE SERVED
